

Ethics & Fairness in AI

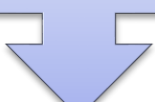

Ethics in Artificial Intelligence refers to the regulation of activities of AI systems and robots.

Right now, AI can beat humans in some specific tasks only but in the future, it is expected of AI to beat humans in all cognitive tasks.

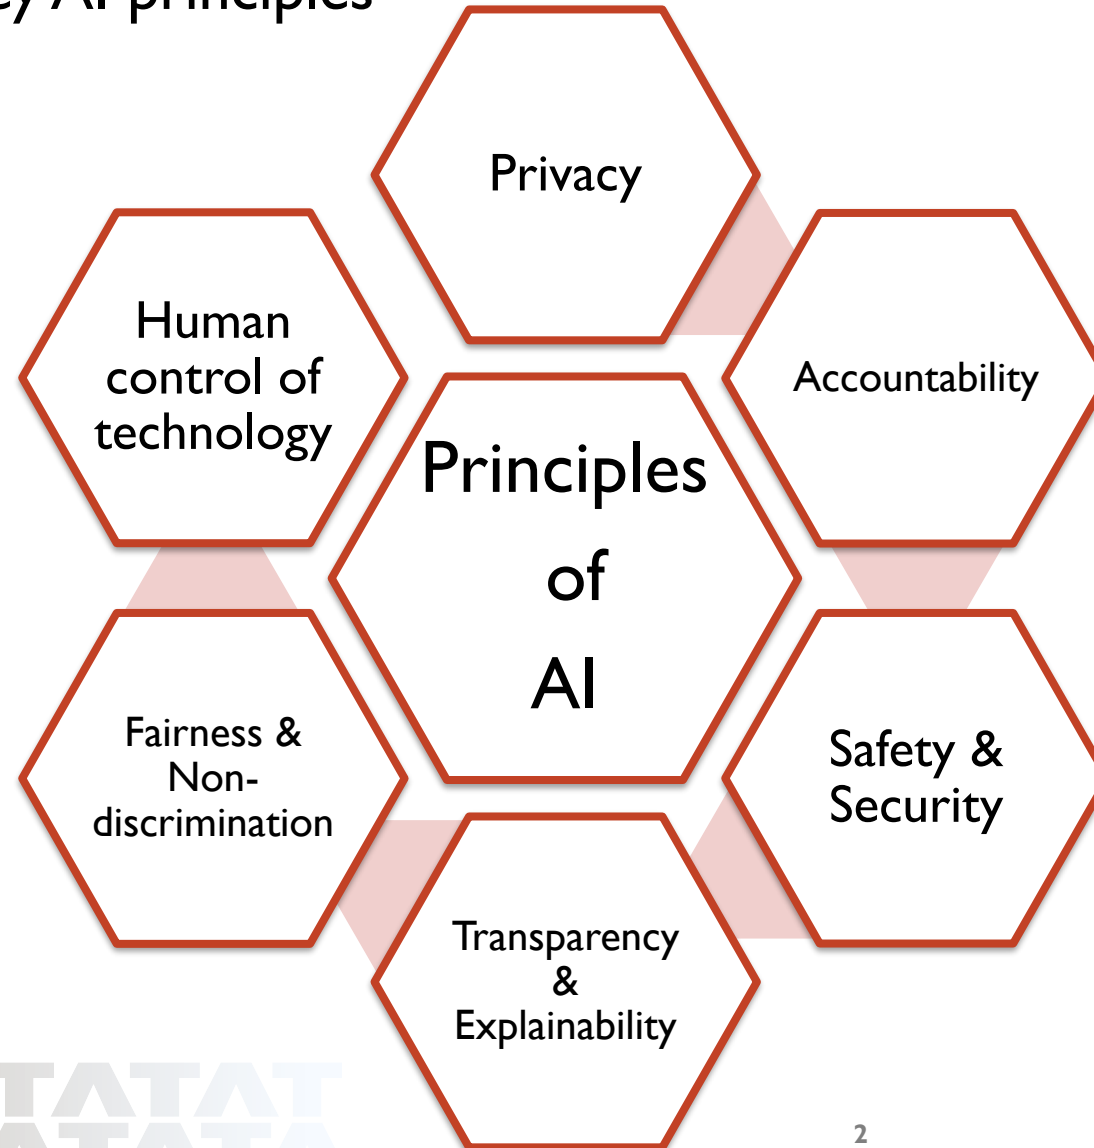

With the advancement of technology, it is of utter importance to have some direction defined for the moral behavior of AI machines towards human beings and vice versa.

Artificial intelligence innovation holds unbelievable promise for driving social progress, however, it can likewise undermine principal rights and freedoms.

Ethics & Fairness in AI

The 8 key AI principles

This [TED Talk](#) discusses some key principles of ensuring ethics in AI
